GALIT AMBIDEXTRE

dental unit

GALIT AMBIDEXTRE — your point of flexibility in dental practice. Usage both by left and right-handed dentists.

For more than 20 years GALIT is determined to supply the best dental equipment and innovative solutions to professional dentists around the world.

Our focus on exemplary service forms a loyal long-term relationship with our customers. More than 5,000 dentists have already tested the quality and reliability of our equipment. All this is possible due to careful monitoring of the requirements of our customers, as well as principles that are fundamental to GALIT.

In our work we are constantly guided by the following values:

- quality – we work to the highest quality standards in everything we produce;
- trust – respect, honesty and sincerity guide our actions to do the right thing;
- care – our customers inspire us to act faithfully and passionately;
- innovation – we optimize the latest technology to achieve mastery in dentistry;
- partnership – we work with professional dentists and our partners to win TOGETHER;
- commitment – we work diligently and efficiently to provide exceptional results with the best customer service.

Practical and universal GALIT AMBIDEXTRE — an optimal solution for clinics where one dental unit can be used by a right- handed and left-handed dentist

Key benefits of Galit Ambidextre:

- a unique rotation mechanism allows you to change location of the doctor console and assistant console from right to left in just a few seconds;
- components of leading European manufacturers with warranty service;
- exquisite Italian design;
- optimal use of workspace;
- ability to choose the mounting of the lamp and the doctor console to the ceiling or to the chair;
- even more space to communicate with your patients;
- a wide range of configurations for exceptional comfort during treatment.

Take advantage of optimal ergonomics with Galit Ambidextre!

**GALIT AMBIDEXTRE –
for supreme patient comfort**

Even more space for interaction with patient

Dentist console of your GALIT AMBIDEXTRE

A unique rotation mechanism allows you to change location of the dentist console and assistant console from right to left in just a few seconds.

Dentist console of a new design with upper or lower delivery of hoses and maximum of 5 instruments.

Possible versions of the dentist console attachment:

- to chair;
- to ceiling.

Dentist console with upper delivery of instruments provides:

- individually selected 5 instruments;
- light construction;
- fixation in the right place by means of pneumatic brake;
- control panels for instruments and patient chair.

Dentist console with lower delivery of instruments provides:

- individually selected 5 instruments;
- light construction;
- control panels for instruments and patient chair;
- adjustment of instrument inclination angle;
- convenient adjustment of water amount to cool instruments.

Effective interaction between dentist and assistant is a key factor in quality treatment

Assistant console of your GALIT AMBIDEXTRE:

The assistant can control a wide range of control panel functions. This will allow the dentist to fully focus on medical procedures with the patient.

The assistant console on a rotary arm with independent channels of saliva ejector and dust extractor with the ability to move to the right and left side of the chair.

Horizontal and vertical movement of the assistant console allows you to place the instruments in a convenient position.
