

Choosing the perfect operator chair is crucial for any professional’s health. Tecnodent has always been committed to developing ergonomic stools that support the dorsal spine in maintaining its natural posture, ensuring proper and balanced distribution of body weight to prevent pressure-related pain.

STING line stools are created to fit the needs of those professionals who stay seated for several hours. The saddle-shaped seat allows the legs to maintain the correct “V” position, ensuring optimal body posture, which relieves the dorsal spine from aches and improves circulation. Positioned between a pure saddle stool and a classic stool, **STING** - and the backless version **STING LE** - offer an ideal balance for those seeking ergonomic support during long treatment sessions. The seat design promotes ventilation, preventing overheating while further enhancing ergonomic posture.

STING stool is available in both versions, with and without backrest. It can aslo be equipped with optional footrest ring.

STING line offers the highest comfort to the most demanding professionals. in every field.
